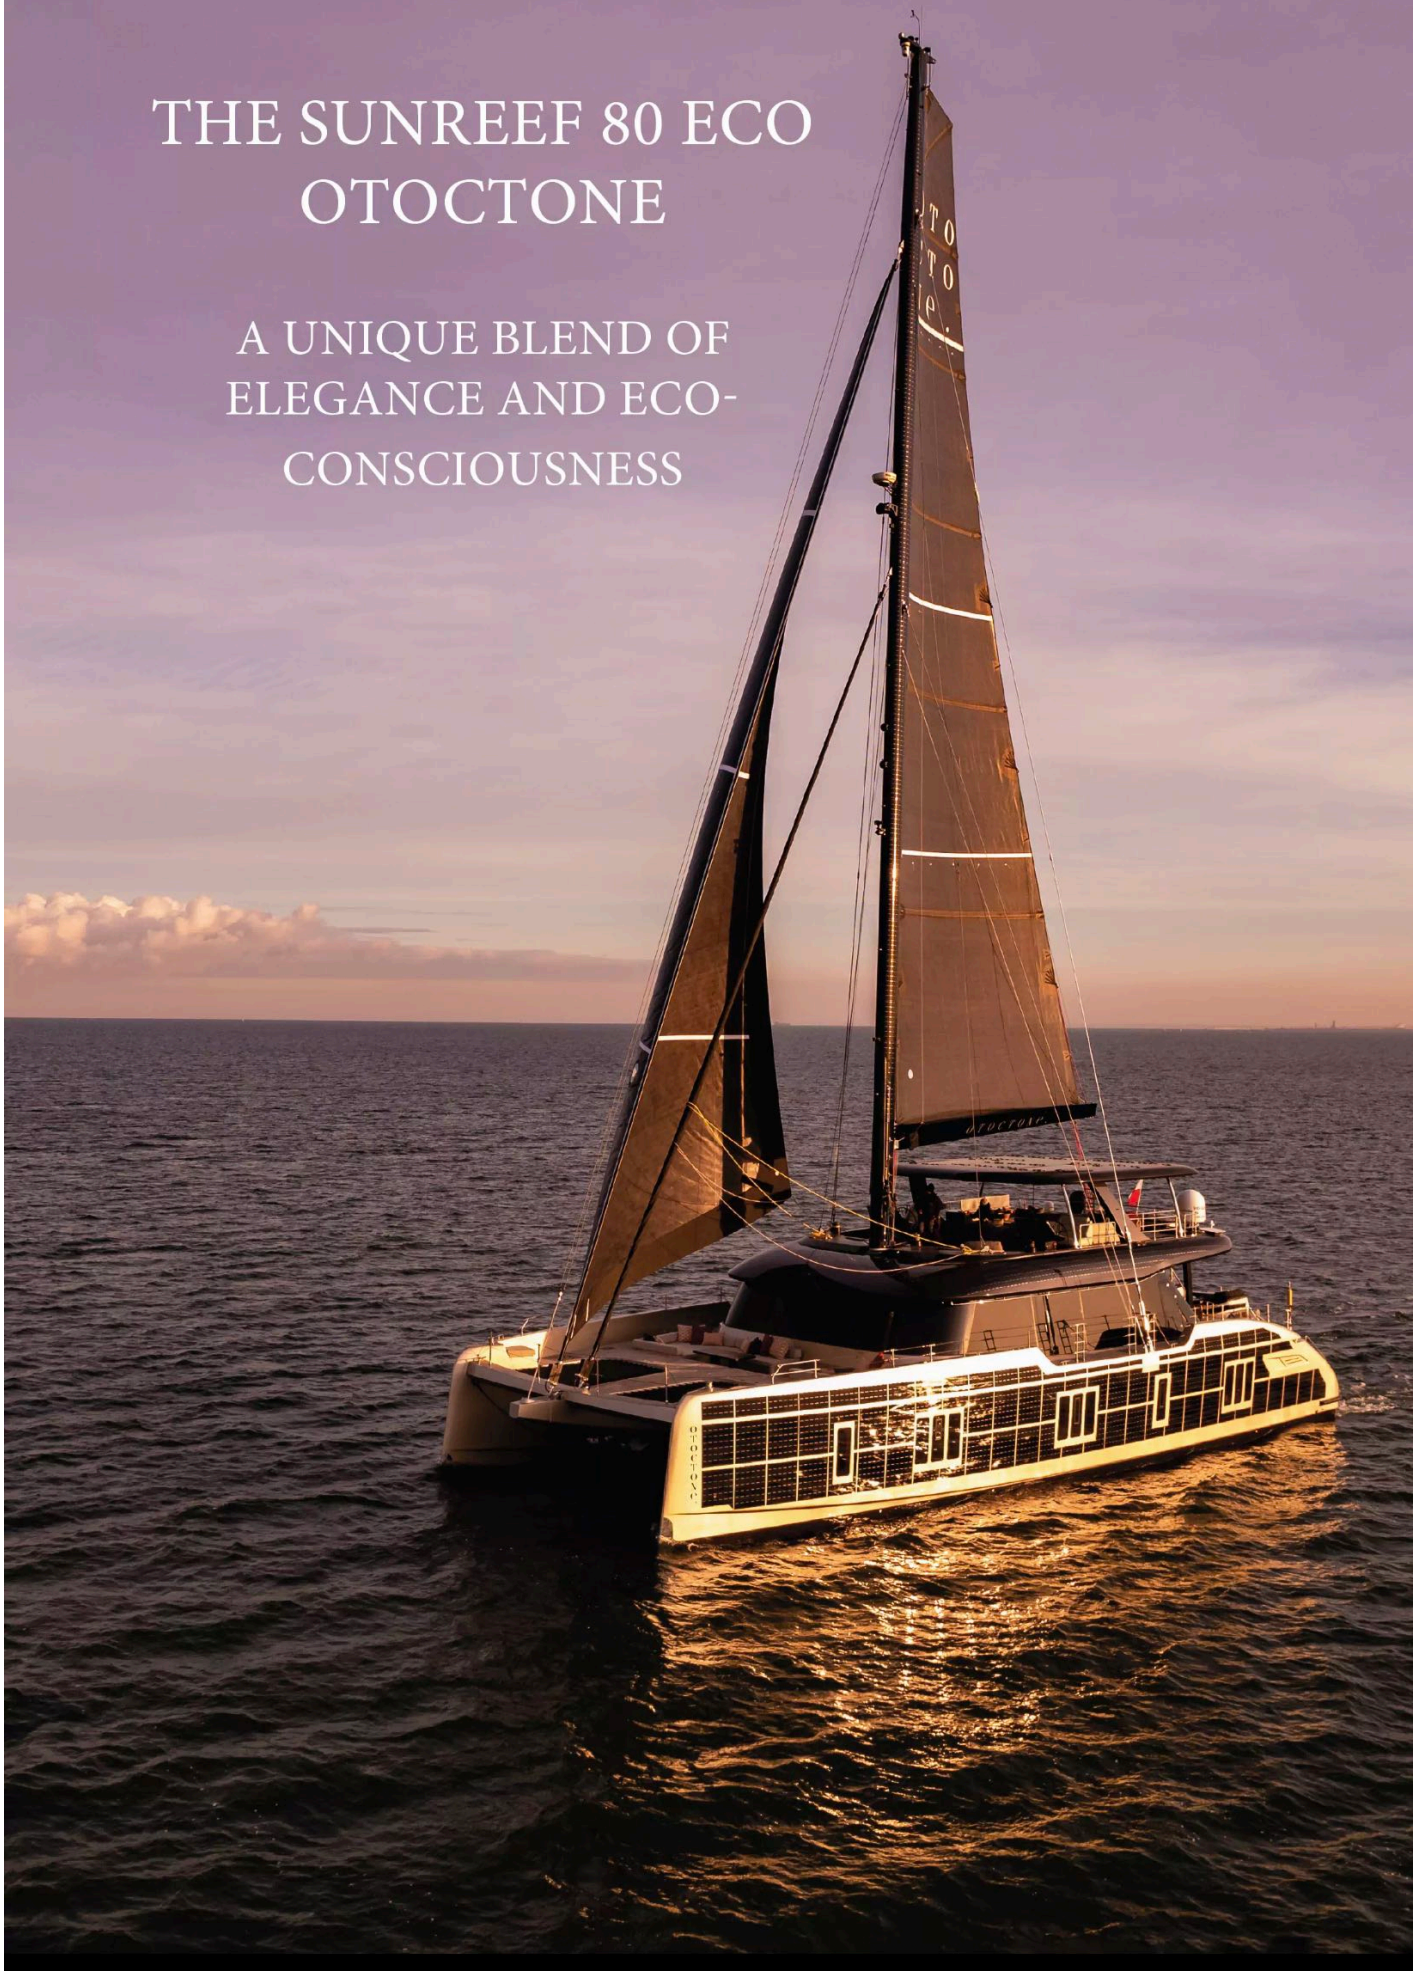
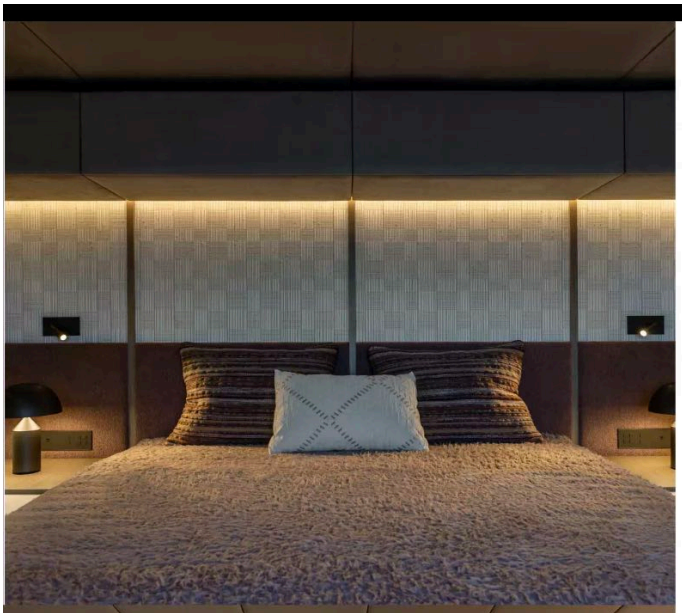
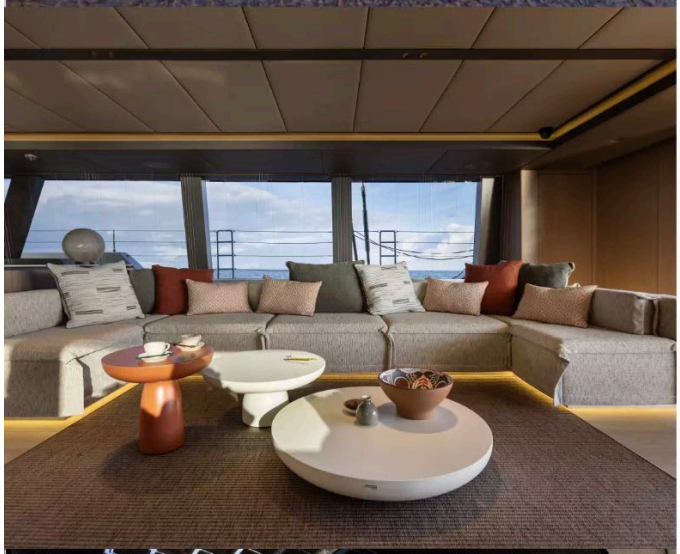
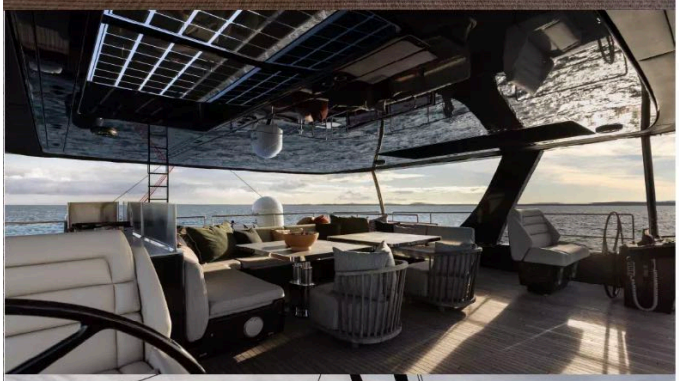
THE SUNREEF 80 ECO OTOCTONE

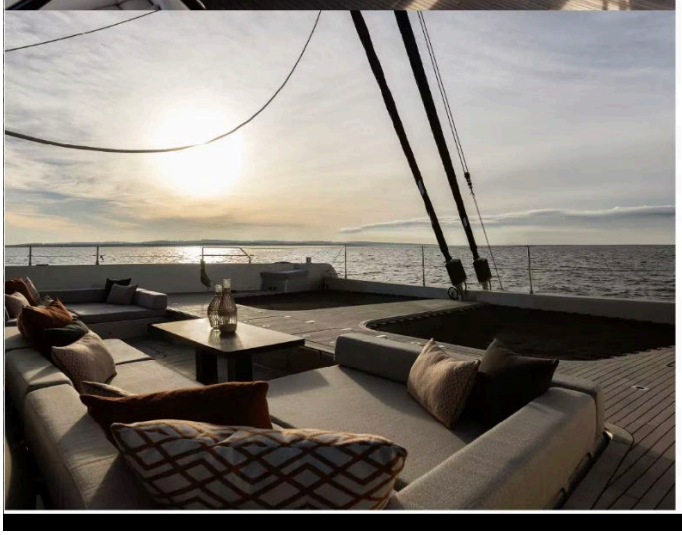
A UNIQUE BLEND OF ELEGANCE AND ECO-CONSCIOUSNESS











Sunreef Yachts has recently presented the Sunreef 80 Eco OTOCTONE. Commissioned by a repeat customer, having previously built two Sunreef motor yachts, the electric sail yacht will offer a noiseless and fume-free cruising experience. The yacht is also available for charter, offering a unique blend of opulence and eco-consciousness for an unforgettable sailing adventure.

Harnessing the Power of the Sun

Equipped with two 180 kW engines and a set of 550 kWh batteries, the super cat is fitted with Sunreef Yachts' revolutionary solar power system with panels fully integrated with the composite structures. Thanks to this technology, the Sunreef 80 Eco provides unrivalled solar power for extended range and clean cruising. The yacht is also equipped with a hydrogeneration system, producing clean power while under sail.

Custom-Tailored Layout

The 4-cabin catamaran boasts a custom-tailored layout to accommodate eight guests in full luxury. Her interiors stand out with a contemporary and refined look, accentuated by designer furniture and light natural fabrics. The main saloon's panoramic glazing lets plenty of natural light in, enhancing the feeling of space.

Luxurious Interior Spaces

The starboard part of the saloon offers a soothing lounging area with a large sofa. To portside, there is a big dining table seating up to ten. The relaxation space of the saloon opens both onto the aft cockpit and bow terrace.

The décor of the staterooms continues the chic and contemporary ambience found in the main saloon, with a slightly darker color scheme. All of the cabins offer luxury, style, lots of practical storage and beautifully appointed bathrooms.

Spectacular Aft Cockpit and Bow Terrace

The full-beam aft cockpit offers a fantastic dining space with ocean views, a daybed, a drinks bar and a hydraulic platform to enjoy long sunning sessions and watersports.

The bow terrace of OTOCTONE 80 is a wonderful retreat with spectacular views. Here, the yacht's guests can enjoy long get-togethers on the oversized sofas and lounging on the split trampolines.

Ultimate Flybridge Dining Experience

The flybridge is quite possible the catamaran's best alfresco dining spot, with a large modular table, numerous seating options and a bar with barbecue.

Charter Opportunity

Focusing on sustainability, OTOCTONE is also available for charter. Unique in many ways, she will make you discover Corsica and Sardinia from a different perspective: utter silence, impressive comfort, and a special connection with the sea. Based in Porto-Vecchio, OTOCTONE will be sailing in Corsica and Sardinia during summer 2024.
